# SailPoint

Protect with Confidence

In today's rapidly evolving IT environment, Identity Security has become increasingly complex. Establishing a solid Identity Governance program is critical, now more than ever.

With that goal, we are excited to continue the Houston SailPoint User Connect Group, where Identity Security leaders and practitioners can come together to solve problems as well as exchanging best practices and ideas.

Register now to connect with your peers and learn how they are building and evolving their Identity Governance programs to address a growing number of business challenges.
