HIBERNATE CHANGES FROM 2.0 or Accelerator Pack BETA TO 2.2

1. A new named column "apaccountType" is added to Link and CertificationItem Hibernate Files
2. Drop of saccountOwnertwo extended attribute from Identity Hibernate file

HIBERNATE CHANGES FROM 2.1 TO 2.2

- A new named column "apAccounttype" is added to Link and CertificationItem Hibernate Files

CUSTOM OBJECT CHANGES FROM 2.0 or Accelerator Pack BETA TO 2.2

1. Object Name: Custom-ApprovalFrameWorkMappings
    a. **Addition of Key Value**
        i. <entry key="Workgroup"> is added to Approval Types Entry
    b. **Change of Key Values**
        i. <entry key="CREATE IDENTITY FEATURE"><value><List><String>ManagerOrServiceAccountOwner</String><String>Workgroup</String></List></value></entry>
        ii. <entry key="EDIT IDENTITY FEATURE"><value><List><String>ManagerOrServiceAccountOwner</String><String>Workgroup</String></List></value></entry>
        iii. <entry key="REGISTRATION FEATURE"><value><List><String>ManagerOrServiceAccountOwner</String><String>Workgroup</String></List></value></entry>
        iv. <entry key="Operations" value="false"/> is added to Split Eligibility Entry
2. Object Name: Custom-Framework-Common-Settings
    a. **Change of Key Value**
        i. <entry key="serviceAccountOwnerAttrs" value="saccountOwnerone,administrator"/>
    b. **Addition of Keys- These keys need to be merged manually**
        i. <entry key="globalWait"><value><Integer>60</Integer></value></entry>
        ii. <entry key="existingAccessRequest"/>
        iii. <entry key="existingAccountRequest"/>
        iv. <entry key="existingBatchAccessRequest"/>
        v. <entry key="existingBatchAccountRequest"/>
        vi. <entry key="apEnableAutoApprovalsAccessAccountRequest" value="FALSE"/>

DEPRECATED OBJECT CHANGES FROM 2.0 or Accelerator Pack BETA TO 2.2

- Rule-NativeChange-RuleLibrary.xml is deprecated

DEPRECATED OBJECT CHANGES FROM 2.1 or BETA TO 2.2

- Rule-NativeChange-RuleLibrary.xml is deprecated

STORIES

[RAPIDSS-7] - Multiple Tiers Across Privileged Accounts. Multiple Tiers Across Privileged Accounts. This feature is used for validations on access request where privileged access account type on either roles or entitlements matches privileged account type

[RAPIDSS-320] - Accelerator Pack + SAP GRC Workflow Integration. Access Request. Dedicated GRC Workflow and Rule that can be implemented for any GRC Integrations for example SAP, SafePass, etc.

[RAPIDSS-322] - Manager email CC functionality via workgroup or rule (GA Customer). A new exception rule can be used to cc anyone on manager notifications

[RAPIDSS-350] - Simplify Emails To Managers (ALL GA Customers). Emails To Managers for example Joiner, Leaver, Reverse Leaver, and Rehire can be configured to have simplified business language

[RAPIDSS-351] - Configurable Email To Operations (ALL GA Customers). Lifecycle event emails can be configured to be sent out to Operations

[RAPIDSS-323] - Separate LEAVER Process on the basis of Employee type or Population (GA Customer) Leaver options can be configured per population on applications using Advanced Application Settings via Debug Page

[RAPIDSS-326] - Leaver - Correlation Trigger Validations (GA Customer). Lifecycle event can be configured to handle terminated accounts not coming through HR feed

[RAPIDSS-331] - Additional Aggregation Rules (GA Customer). All Aggregation rules can be extended using additional aggregation exception rules for example customization, managed attribute customization, creation, correlation, after provisioning, pre-iterate, and group refresh rules

[RAPIDSS-361] - Identity User Type Tagging based on Authoritative Application. Identity cubes will be tagged as Contractors, Employees, and Service Accounts based on authoritative source aggregation configuration suing Self Service Onboarding QuickLink

[RAPIDSS-332] - Audit Class Custom Enablement (All GA Customers). By default, class Custom object is enabled

[RAPIDSS-359] - Authoritative Source Applications - Enable Attribute Synchronization. Authoritative Source Applications can be configured for Attribute Synchronization to solve use

cases where source is HR System for example synchronizing Active Directory email to HR system

 [RAPIDSS-362] - Is Identity Eligible for Attribute Synchronization. A new exception rule on Attribute Synchronization to fire off Lifecycle event

[RAPIDSS-345] - Move ALL QuickLinks to Configure Folder. All QuickLinks are moved to Configure folders

[RAPIDSS-368] - Additional Workgroup Approval for Create Edit Register. Additional Workgroup approval is added to Manager or Service Account Owner Approval

[RAPIDSS-370] - Entitlement Population Addition - Joiner Roles Automation. A new extended attribute on entitlements to automate joiner roles for next Accelerator Pack Version

[RAPIDSS-360] - Accelerator Pack Version 2.2. Version is added to System Configuration

[RAPIDSS-381] - Enable Application Scoping on Self Service Onboarding Form

BUGS:

 [RAPIDSS-267] - Aggregation Fields/Drop-Downs automatically clear out after setting values

[RAPIDSS-309] - When approving first level approval on entitlement, identityRequestItem is marked as finished even though 2nd level approval is awaiting decision (BETA Customer)

[RAPIDSS-318] - Loopback Connector Bug From SSD (GA Customer)

[RAPIDSS-321] - Persona Rehire/Mover LCE not removing Birthright Roles (BETA Customer)

[RAPIDSS-329] - Persona Identity Attribute Rules should not be configured by default (BETA Customer)

[RAPIDSS-333] - Password Interceptor Incorrect Workflow Step (BETA Feature)

[RAPIDSS-334] - Service Account Correlation not working properly for AP 2.1 (BETA Feature)

[RAPIDSS-335] - Password Synchronization Looping (BETA Feature)

[RAPIDSS-336] - Leaver Persona Not Kicking Off When Previous Active and New Empty (BETA Customer)

[RAPIDSS-337] - Attribute Sync CREATEPOLICY for AP 2.1

[RAPIDSS-338] - Could not get AppDetails for a non-existent application (ALL GA Customers)

[RAPIDSS-340] - Persona Unable to Create New Account Successfully on Rehire when birthright roles are enabled (BETA Customer)

[RAPIDSS-342] - Accelerator Pack granting too many privileges by default

[RAPIDSS-343] - High: Defer Account Deletion Date is Picked from Remove Entitlement After X days (GA Customers)

[RAPIDSS-344] - Persona Disable Role Detection Filter Joiner/Rehire Configuration

[RAPIDSS-349] - TicketId not passed in as argument to Wrapper Workflow steps (BETA Feature)

[RAPIDSS-352] - renameLDAP attribute sync feature does not handle comma in CN

[RAPIDSS-355] - Incorrect IdentityRequest filter in Reverse Leaver workflow for AP 2.1

[RAPIDSS-356] - Create Identity WF only sets identity name and type attributes at first, meaning approval of created identity has limited attributes to show

[RAPIDSS-357] - Attribute sync self-service onboarding form check needs to know when special provisioning plan attribute is valid

[RAPIDSS-363] - Both Recover Access and Reverse Leaver process only one account when there are multiple accounts in same application

[RAPIDSS-364] - Both Recover Access and Reverse Leaver change nativeIdentity to all upper cases when processing OU move

[RAPIDSS-365] - Confusing Leaver option "Delete Immediately After X days"

[RAPIDSS-369] - Rename Peer Level Escalation Rule to Escalation rule

[RAPIDSS-371] - AttributeSync: LDAP Rename gets calculated for all target attributes not just

[RAPIDSS-372] - AttributeSync: getNativeIdentity should pass in current link to rule to allow for other attributes to be used.

[RAPIDSS-373] - AP 2.2 Beta: Attribute sync change nativeIdentity to all upper when rename is involved

[RAPIDSS-374] - Reverse and Recover Empty IQService Error

[RAPIDSS-375] - For create identity/edit identity/ and registration, implicit approval feature is not working

[RAPIDSS-376] - Triggers based on attributes don't allow for non-string values. It ends up skipping the trigger

[RAPIDSS-377] - AP 2.2 beta: "View Details for " link is missing in Workgroup approval work item

[RAPIDSS-379] - Configurable workgroup name for batch approvals

[RAPIDSS-378] - Reverse leaver: Workflow-FrameWork-Wrapper were launched sequentially exactly 4 times in every test.

[RAPIDSS-382] - Persona: getApplicationsForJoiner needs to be updated for additional mover scenarios
